

WHAT IS CLAIMED IS:

- 1 1. A wrist rest capable of vertically storing up keyboard, comprising:
 - 2 a wrist rest body;
 - 3 at least a movable piece, being kept in an interior of the wrist rest body in way of
 - 4 being able to slide out of the wrist rest body and being pivotally connected to the
 - 5 wrist rest body; and
 - 6 at least one wall plate, being pivotally connected to the movable piece, being
 - 7 able to rotate a preset angle and held in position;
 - 8 whereby, the keyboard can rest against the wall plate, which has been rotated to the
 - 9 preset angle.
- 1 2. The wrist rest for keyboard as defined in claim 1, wherein movable piece is a slide
- 2 piece that can slide out horizontally from the wrist rest body.
- 1 3. The wrist rest for keyboard as defined in claim 2, wherein the slide piece can be a
- 2 first slide piece, which is pivotally connected to the wrist rest body, and a second
- 3 slide piece, which is pivotally connected to the first slide piece.
- 1 4. The wrist rest for keyboard as defined in claim 3, wherein the wall plate is pivotally
- 2 connected to the second slide piece.
- 1 5. The wrist rest for keyboard as defined in claim 1, wherein the movable piece is a
- 2 pivot piece that can be rotated out from the wrist rest body.
- 1 6. The wrist rest for keyboard as defined in claim 5, wherein the wall plate is pivotally
- 2 connected to the pivot piece.
- 1 7. The wrist rest for keyboard as defined in claim 1, wherein the preset angle is 90
- 2 degrees.
